

Predicted defect probabilities

Ungated diagnostic policy

GDMR on all
unanswerable images
AIRB on all answerable

Diagnostic question:
"what is wrong
with this image?"

Offline proxies:
no user retake is
evaluated in either policy

Refusal-gated policy
(confidence gate first)

Guidance issued only
for refused examples

Gated GDMR / gated AIRB
with explicit denominators
(conditional precision,
end-to-end coverage)
